Subject: Spike Sample Split Analysis for ARD
[CRL Request Form 8-23-13 -Veolia Spike.doc](#)
[DRAFT LCD SAP 2013 Veolia Spike.docx](#)
[DRAFT LCD Field Sampling QAPP 2008 for Veolia Spike 2013.docx](#)

Amanda,

Please find attached a CRL request form. I've also customized our LCD SAP and QAPP for this project and attached them. I apologize for the short notice. We only found out when I returned from vacation earlier this week that this activity would happen so soon. Please feel free to contact me or Jamie Paulin with any questions. We understand that the proposed verbal results schedule is tighter than usual. Please note that I did not specify which analytical method CRL will use if you can accept this sample. I hope we can fill that in later after you've had a chance to look at this.

- Jamie,

I don't know if you require that a site-specific QAPP and SAP be prepared for a **single split sample**, nevertheless I took a stab at it. Please especially consider the proposed decision rule in the QAPP as DRAFT until you and Chris get to look at it.

Please also note that this work is being performed for the Air and Radiation Division at their request. Shannon Downey is the project manager.

Thanks,

Todd D. Ramaly
